CESSNA
CITATION
CJ3

SUPERIOR AND UNPARALLELED RELIABILITY.

Considered to be an extremely popular aircraft, the CJ3 has one of the longest cabins in the light jet class, giving passengers plenty of room to stretch out.

Capacity	7+1
Year of Manufacture	2007
Year of Refurbishment	In: 2020 Ex: 2020
WIFI	N
Cabin Length (feet)	16
Cabin Width (feet)	5.8
Cabin Height (feet)	4.8
Baggage Capacity (Cu. feet)	65

The additional stretch in the cabin over the CJ2 model allows greater space, promoting increased productivity. Taller passengers have plenty of room to stretch out and enjoy their flight. The CJ3 can easily accommodate up to seven passengers comfortably.

The avionics suite in the Citation CJ3 is the top of the line with the Collins Pro Line 21. The technological improvements do not stop in the cockpit. The airplane also benefits from improved engines. The FJ44 engines by Williams put out more thrust, all the while using less fuel than previous versions. All these improvements allow the Citation CJ3 to carry more weight, farther, using less fuel.
